

MELATONIN tablets 3 mg and oral solution 1 mg/ml for jet-lag

The Pan Mersey Area Prescribing Committee does not currently recommend the prescribing of MELATONIN tablets 3 mg and oral solution 1 mg/ml for jet-lag.

GREY

Melatonin tablets 3mg and oral solution 1mg/ml are licensed for the treatment of jet-lag in adults.¹

This recommendation will be reviewed following a full assessment of the evidence, if melatonin for treating jet-lag is identified as a local NHS commissioning priority and a formal applications for use is received and prioritised for in-year review.

This recommendation also applies to any off-label indications for melatonin tablets 3mg, and oral solution 1mg/ml.
