

**NETARSUDIL-LATANOPROST eye drops (Roclanda® ▼)
for open-angle glaucoma or ocular hypertension**

The Cheshire and Merseyside Area Prescribing Group does not currently recommend the prescribing of NETARSUDIL-LATANOPROST eye drops (Roclanda® ▼) for open-angle glaucoma or ocular hypertension.

GREY

Netarsudil-latanoprost is indicated for the reduction of elevated intraocular pressure (IOP) in adult patients with primary open-angle glaucoma or ocular hypertension for whom monotherapy with a prostaglandin or netarsudil provides insufficient IOP reduction.^[1]

This recommendation will be reviewed when the [NICE TA](#) is published.

In the meantime, clinicians should continue to follow national guidance, local pathways, and local formulary choices for the treatment of open-angle glaucoma or ocular hypertension:

- > NICE guideline [NG81]: [Glaucoma: diagnosis and management](#), updated 26 January 2022
- > Cheshire APG Formulary Chapter 11: [Eye](#)
- > Pan Mersey APC Formulary Chapter 11: [Eye](#)
